The Ghost in the Machine is a 1967 book about philosophical psychology by Arthur Koestler. The title is a phrase (see ghost in the machine) coined by the Oxford philosopher Gilbert Ryle to describe the Cartesian dualist account of the mind – body relationship. Koestler shares with Ryle the view that the mind of a person is not an independent non-material entity, temporarily inhabiting and governing the body.

Arthur Koestler wrote literature and fiction in nineteen forties and early nineteen fifties. In late fifties he turned to science. In "The Ghost in the Machine" he concludes, and I feel he does so without much conviction, that the human race, owing to some faults/defects during evolution, may be marching to its early end.

3.0 out of 5 stars Holons. Reviewed in the United Kingdom on 14 September 2012. Format: Hardcover Verified Purchase. "The Ghost in the Machine" is about Wholeness as a concept, but in that respect acknowledges the nature of a part in the structure of the whole as having a recognisable identity; thus a holon can be described as, "An entity that has a boundary within its environment, from which it derives its identity" - like a blood cell, or a close knit tribal group within a larger society.

'Ghost in the Machine' is partially a concept album based on a book of the same name by Arthur Koestler. The book, which had a profound effect on Sting, is a critical attack on Behaviorist psychology, which Koestler maintains is not the panacea it claims to be but an insidious reduction of human beings to machine status.
